

USER STORY

#251

Generate Report for Appointments total hours per month

Description

Description:

This function should calculate the total hours the teacher spent per month in meetings with the enrolled students.

- a) Actor: Teacher.
- b) Pre-condition:
 - The teacher must register a least one appointment per month to enable the function calculate the total hours of meetings per month.
- c) Post-conditions:
 - a) The hours must be saved in the database.
 - b)The teacher should be directed to the report that the total hours of appointments per month.
- D) Alternative flow :
 - there are no Appointments assigned to the teacher , so it will get no thing in the report.so the teacher has to add at least one appointment.
