- By Clicking Show More you can be adding **Default enrolment duration** and when it starts?

How to install a plugin:

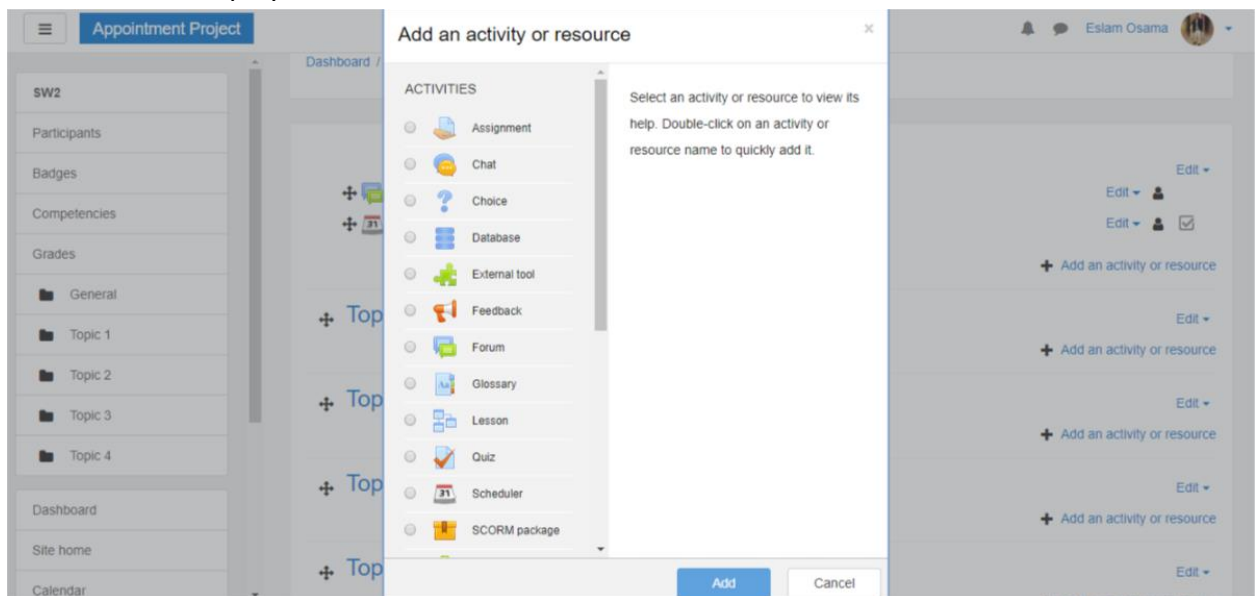

- After Installing Moodle, you will have to install a plugin from Moodle Plugin to use it's feature in your website, Open Dashboard from the side menu and click **Site Administration**.
- After Clicking **Site Administration** click on Plugin Tab to install it:

- After Click on Plugins Tab Click on Install Plugins, your plugin will be downloaded from Moodle Website as **.zip** file Drag and Drop it to Install Plugin ZIP File then click Install Plugin from **.ZIP** File after it click on upgrade Moodle Database after that your plugin will be installed successfully

How to use an installed plugin:

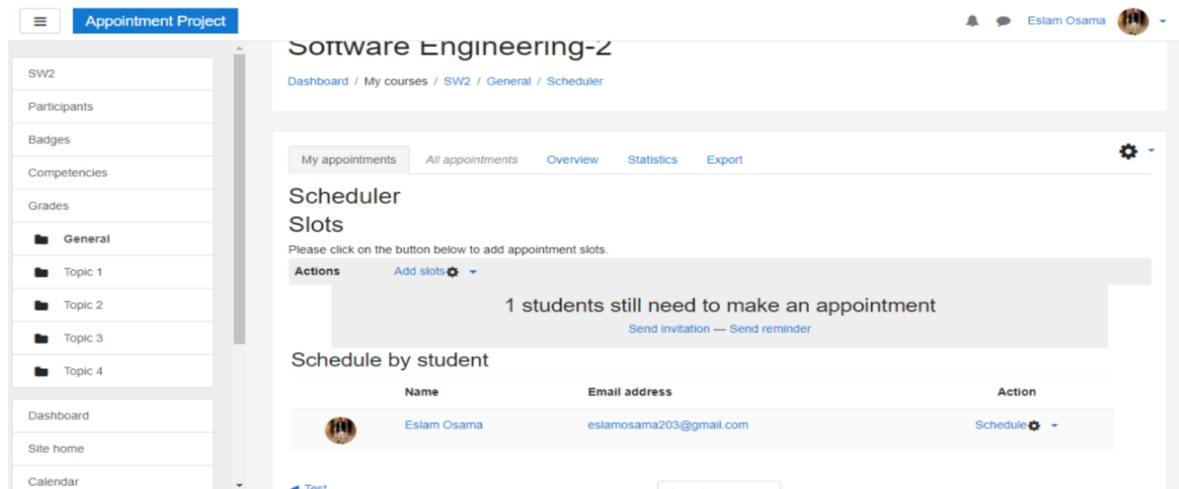

- After Creating a course and naming it and Creating User and its role.
- , click on **Site Home** you will have Courses which were created then click on it or click on the short name of Course in the side menu like the above example: **SW2**
- Click on the setting icon that is on the left of Course name and choose turn editing, the hidden icons and button will be displayed then click on **Add an activity or resource** this screen will be displayed:

This pop-up window includes all plugins you have, and the plugin will be installed chose any plugin you want and click add.

- Then Enter The name and any required Data in field and click save and displayed.

- For Example, I choose scheduler plugin (I've installed it to my Moodle I will explain how to install plugin later), after all of that you will have this screen

- From this page you can make and schedule between users or users as their roles: as teacher, student, manager.
- From this page you can send invitation to users or users as their roles: as teacher, student, manager.
- Or you can add slots to teachers to add this plugin to schedule appointments between them and their students.
- To connect on the database of Moodle and your plugin you should download Moodle Adminer Plugin from here https://moodle.org/plugins/view.php?plugin=local_adminer
- Install it like above method in installing plugins.
- Then, Go to Site Administration then Server Tab then **"Moodle Adminer"**

- Enter Moodle and Check Tables and Your Plugin Database to be able to get tables and know your records.

- You can open plugin folder by entering Folders Moodle Folder name -> Moodle -> Mod -> **"Plugin Name"**
- Inside this folder you will find plugin database and UI Files and PHP files and connections you can find all if them in the folder.

How to remove Moodle:

- First, you should Stop running Moodle from **"Stop Moodle"** icon In the Moodle folder
- Then you delete the Moodle Folder from the partition it will be uninstalled from your pc and if you go to the site URL 127.0.0.1 you will have and error page because you have uninstalled Moodle
